

Guam COVID-19 Situation Report - 69

March 12–May 27, 2020

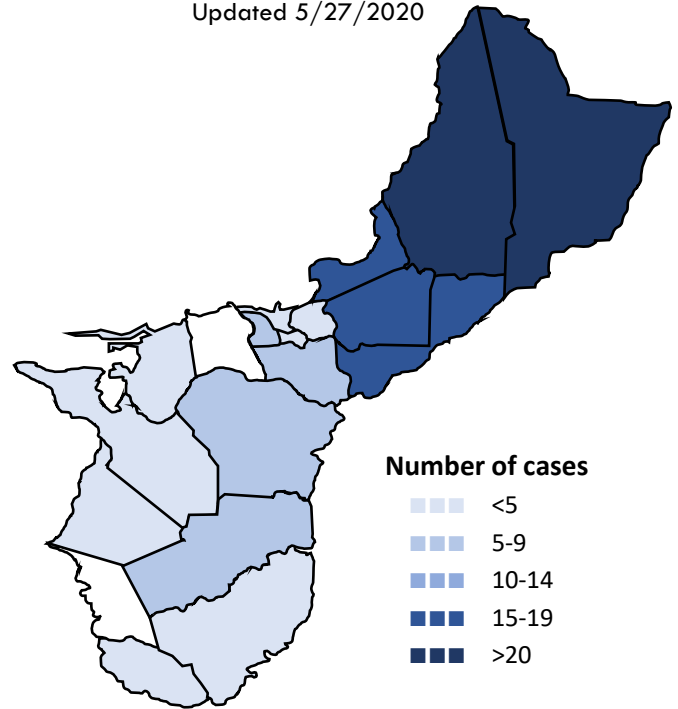

Summary

As of May 27, 2020, there have been 170 cases of COVID-19 reported on Guam. Two new confirmed cases and one new probable case of COVID-19 were reported to DPHSS on May 26, 2020.

The two confirmed cases tested positive by PCR testing at GPHL and were identified through contact tracing. The cases were asymptomatic as the time of testing and are associated with a significant cluster of COVID-19. One new probable case was reported by GRMC.

Four COVID-19 cases were reported released from isolation on May 26.

Confirmed COVID-19 Cases, Primary Reported Residence
Updated 5/27/2020

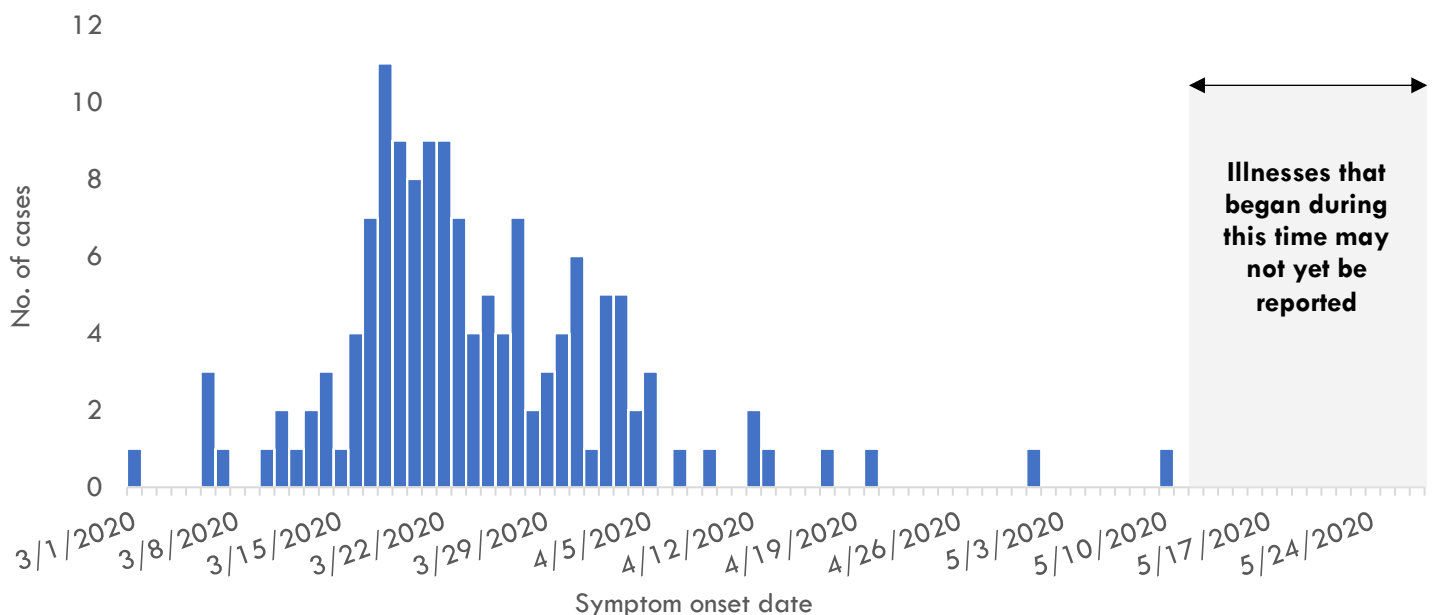

COVID-19 Case Count*	170
Confirmed cases	163
Probable cases	7

* <https://www.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/>

COVID-19 Testing on Guam**	Total	New tests reported today	Percent positive**
COVID-19 Tests	5,803	141	2.8%
PCR Tests	5,749	141	2.8%
Serology Tests	54	0	1.9%

** See COVID-19 Testing Breakdown for all testing definitions. Positives from DOD were double counted yesterday among total testing numbers. Total testing numbers have been adjusted. DOD testing now included in percent positive calculation.

Confirmed COVID-19 cases by symptom onset date, Guam

Guam COVID-19 Situation Report - 69

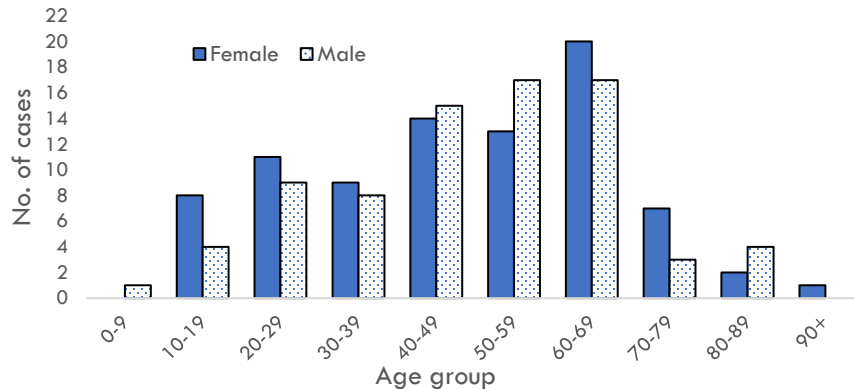

March 12–May 27, 2020

Case Breakdown

Sex		Status		Current isolation location	
Female	86	COVID-19 deaths	5	GMHA	0
Male	84	Hospitalized	1	Home	14
Age Group		Released from isolation†	143	Isolation Facility	4
0-9	1	Returned to isolation§	1	Unknown	2
10-19	13	Epi-Link to COVID-19 case		Military	2
20-29	20	Household Contact	43	Travel History¶	
30-39	19	Healthcare Contact	19	Continental US	5
40-49	30	Community Contact	28	Dubai	2
50-59	31	Residence		Hawaii	3
60-69	39	North	92	Japan	1
70-79	10	Central	49	Philippines	10
80-89	6	South	27	Singapore	1
90+	1	Homeless	2		

Note: Data for recent cases are preliminary and are updated based on findings from case investigations.

Confirmed COVID-19 cases by age group and sex

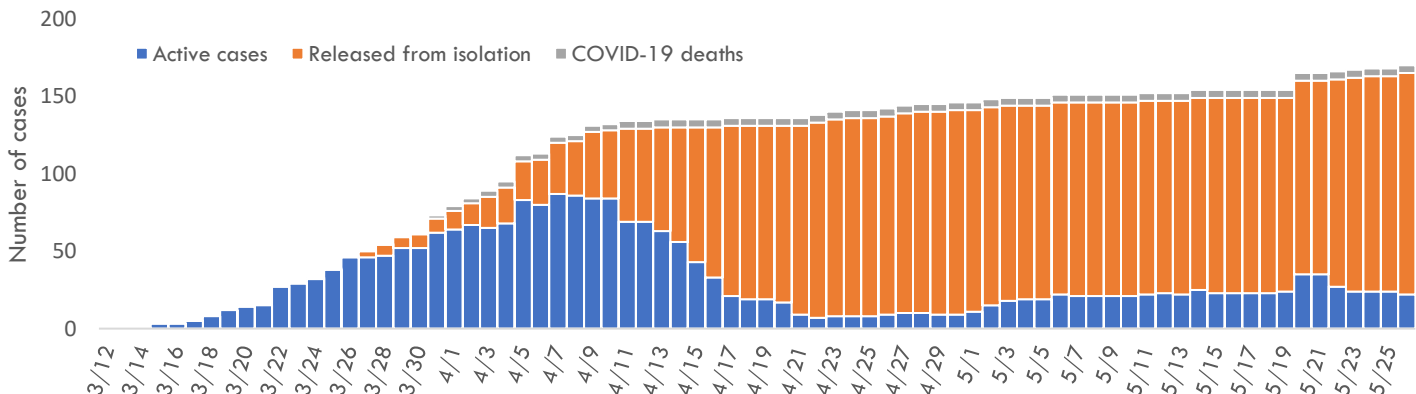

† Cases are released from isolation under criteria outlined on page 4. Generally, the criteria assess time since COVID-19 symptom resolution and the date of their most recent positive test to qualify for release from isolation.

§ Cases that test positive for COVID-19 through follow-up testing return to active isolation and close contacts are placed in quarantine. Fourteen cases have returned to isolation after release; 13 of these have been re-released from isolation.

¶ In the 14 days before symptom onset. Some cases traveled to more than one country.

Number of active cases, cases released from isolation, and COVID-19 deaths, Guam

Guam COVID-19 Situation Report - 69

March 12–May 27, 2020

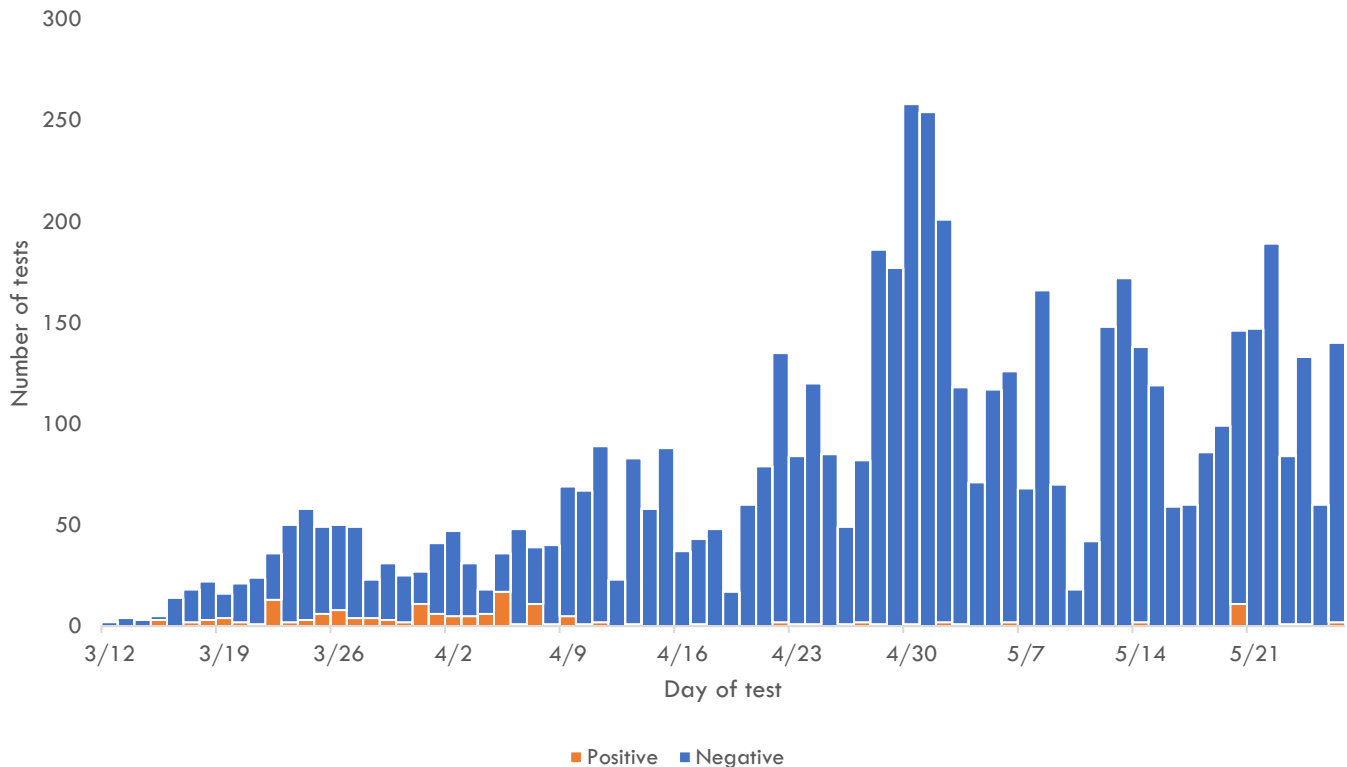

COVID-19 TESTING BREAKDOWN

COVID-19 PCR TESTS	TOTAL	TOTAL POSITIVES	NEW TESTS 5/26
Guam Public Health Laboratory	3,026	141	64
Department of Defense	1,064	14	6
Diagnostic Laboratory Services	833	6	0

Pandemic Condition of Readiness Assessment

Triggers for PCOR - Cases, March 12–May 26, 2020

Triggers for PCOR - Cases, 28-day period following start of PCOR 2 on May 10, 2020

† Criteria for release from isolation

For persons having symptoms: At least 10 days have passed since recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath) and any other symptoms attributed to COVID-19 AND at least 10 days have passed since symptoms first appeared—or, with recurrent symptoms, at least 10 days have passed since recurrent symptoms appeared—AND at least 14 days have passed since the date of their first (or most recent) positive COVID-19 diagnostic test.

For persons without symptoms: At least 14 days have passed since the date of their first (or most recent) positive COVID-19 diagnostic test assuming they have not subsequently developed symptoms since their positive test.
